This highly competitive program aims to recruit outstanding graduate students to our Graduate School of Biomedical Sciences.

Presidential Scholars enjoy the following benefits:

- $5,000 supplement award to stipend for up to 5 years
- Eligibility for relocation expenses (up to $3,000)
- Paid health insurance plan
- Academic enrichment activities with an outstanding peer group

We have outstanding training programs at UTMB in modern biomedical research areas and NIH-funded training programs in translational research, infectious diseases, addiction science, rehabilitation research, minority aging and health, and environmental health.

Our facilities are state of the art and include –

- Galveston National Laboratory
- Institute for Translational Sciences
- Sealy Center for Structural Biology and Molecular Biophysics
- Sealy Center on Aging
- And many others

For early consideration, students interested in applying are strongly encouraged to have their applications complete by December 15, 2014. Interview dates will be in January 2015.

“The Presidential Scholars program enriches my graduate school experience by providing me with unique opportunities for professional development. My mentors and peers in the PS program offer an invaluable network of collaboration and support and inspire me to excel in all aspects of my academic career.”

- Sarah Swinford, 2010 Presidential Scholar
